EXAMINER'S STATEMENTS OF REASONS FOR ALLOWANCE

1. Claims 1-23 are allowable over prior art references because related references do not disclose a quadrature modulating and demodulating a baseband signal including negating a quadrature impairment in the modulator and demodulator using compensation signal processors which include filters and an adaptive control processing and compensation estimation circuit which monitors the baseband signal and updates parameters used by the signal processors to negate the quadrature impairment. Claims 50-55, which have been renumbered claims 24-29, respectively, are allowable over prior art references because related references do not disclose a method of quadrature modulating/demodulating signals including compensating for a quadrature impairment by applying a first and second impulse response to signals and characterizing the quadrature impairment by computing transfer functions.

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Curtis B. Odom whose telephone number is 571-272-3046. The examiner can normally be reached on Monday- Friday, 8-5.
